

Product Data Sheet

1220 - Brush / Roller

Contact Adhesive

DESCRIPTION

Spartan 1220 is a solvent based neoprene contact adhesive. It is designed to adhere PVC skirting and other flooring materials where a quick, contact type bond, is required.

SURFACE PREPARATION

All surfaces should be clean, dry, and free of grease, oil and other contaminants that may affect final bond. Highly porous surfaces may require a prime coat prior to top-coat.

DIRECTIONS FOR USE

Apply Spartan 1220 with a brush to both surfaces. Allow both films to become "touch-dry". Once this is done, press the two surfaces together ensuring maximum contact is made. Apply pressure with a hand roller to ensure a tight bond. Don't use in high humidity. i.e., Above 70% RH.

CLEAN UP

Use suitable Solvent Cleaner to clean tools.

SHELF LIFE

Up to 12 months in sealed container and stored at 20°C.

Note: Always carry out your own test to confirm suitability of this product with your application. Additional information on physical properties, health hazards, storage, handling and transport is available in the Safety Data Sheet (SDS), available on request.
