

Product Data Sheet

1230-500 – Vinyl Seam Sealer

DESCRIPTION

Spartan 1230-500 Vinyl Seam Sealer is a solvent based adhesive designed for the chemical welding the seams in domestic vinyl sheet installations.

DIRECTIONS FOR USE

All seams must be clean and dry prior to seam-sealing. Transfer Spartan 1230-500 Vinyl Seam Sealer to an applicator bottle. Starting at one end of the seam, insert applicator tip into seam and apply a continuous bead along the entire length of the seam.

Avoid excess seam sealer on surface of floor covering.

Masking taping the seam prior to application can help avoid excess seam sealer on floorcovering.

CLEAN UP

Clean tools immediately after use with suitable cleaner.

Note: Always carry out your own site test to confirm suitability of this product with your application. Additional information on physical properties, health hazards, storage, handling, and transport is available in the Safety Data Sheet (SDS), available on request.
