

# Nexus 441 Brush/Roller Contact

## TECHNICAL DATA SHEET

### DESCRIPTION

**Nexus 441** is a solvent based neoprene brush/roller grade contact adhesive used for fixing vinyl skirting and other common flooring materials where a quick contact bond is required to plaster, timber and metal substrates.

### METHOD OF APPLICATION

To obtain the best results, the materials to be bonded should be dry, clean and free from dust, grit, oil, grease and other contaminants that may affect final bond.

Apply an even coat of adhesive to both surfaces by brush or roller. On porous surfaces a second application may be required.

Allow solvent to evaporate and adhesive to become tacky. Place the surfaces together making sure that they are correctly positioned beforehand as no adjustment is possible after the surface has met.

Press both surfaces together, making sure sufficient pressure is applied to bring both surfaces into close contact.

### CLEAN UP

Clean tools immediately after use with **Nexus Adhesive Remover** or **Nexus 490 Solvent Cleaner**.

Dried adhesive may be softened using a **Nexus Adhesive Remover** or **Nexus 490 Solvent Cleaner**.

**IMPORTANT:** Do not use Nexus 490 Solvent Cleaner directly on finish floorcovering, as the solvent cleaner can potentially cause damage to the surface.

### TYPICAL PROPERTIES

<b>Appearance</b>	Light yellow brush-able liquid
<b>Coverage</b>	3 - 4m <sup>2</sup> per litre
<b>Open Time</b>	20 – 40 minutes at 50% Relative Humidity and 21 °C
<b>Curing Time</b>	24 Hours
<b>Packaging</b>	4 & 20 Litre
<b>Shelf Life</b>	12 months in sealed container at 20 °C

**Note:** Always carry out your own test to confirm suitability of this product with your application. Additional information on physical properties, health hazards, storage, handling and transport is available in the Safety Data Sheet (SDS), available on request.
