

# AIR+

*Breathe Easy,  
Work Comfortably.*

AIR+ Active Ventilator is AS/NZS 1716:2012 certified to be used with AIR+ P2 Disposable Masks.

***Breathe Easy Now with***

# **THE WORLD'S FIRST PROTECTIVE MASK POWERED WITH ACTIVE VENTILATION**

Conventional protective masks in the market today are simply not designed for comfortable use at work. With prolonged use, users will often endure stuffiness and discomfort due to the accumulated CO<sub>2</sub>, heat and humidity within the mask. As users re-breathe accumulated CO<sub>2</sub> trapped within the mask, they may experience symptoms of dizziness, reduced alertness and headaches.

Introducing AIR<sup>+</sup> P2 Disposable Mask - an ergonomic protective mask with the world's first attachable ventilator. The AIR<sup>+</sup> mask is engineered for certified protection and superior fit while the Active Ventilator rapidly extracts trapped CO<sub>2</sub>, heat and humidity from within the mask, allowing active circulation of fresh cool air with every breath.

**P2 DISPOSABLE MASK**  
Essential Protection

**ACTIVE VENTILATOR**  
Advanced Comfort and Safety

## **NOW YOU CAN BREATHE EASY AND WORK COMFORTABLY**

# P2 DISPOSABLE MASK
