

GREEN!

No Odor. No Mess. No Kidding.

by **TRAXX**

Now KOOL GLIDE® Technology for Hard Surfaces

Now, with the Kool Glide® system from TRAXX, unsightly face nailing can be eliminated and tedious board replacement is made easy. Just put the board in place over the Kool Glide Utility Tape. Then use the Kool Glide PRO-W to activate the tape right through the board. This system uses patented technology to remotely activate a specially designed tape.

It's safe, fast, easy and strong. If you make a mistake, simply use Kool Glide to reactivate the adhesive and redo the job as needed — *works on carpet too!*

Great for Starter (or End) Rows

...and Repairs!

Lab tests show that the bond made with KOOL GLIDE® is more than 3 times stronger than with a finish nail.

KOOL GLIDE® PRO-W Applications:

STARTER / END BOARD INSTALLATION — For many hard wood fastening jobs, face nailing starter boards or end boards is the only answer. But face nailing is visible from the surface and requires matching and filling. With the Kool Glide® system, simply put the starter board or end board in place and hit the power button. No face nailing, matching or filling!

BOARD REPLACEMENT — The trouble with conventional methods of board replacement is that once you have the board in place, you have to carefully remove it, apply glue to it and replace it. This is difficult and sometimes damages the board. With Kool Glide® you put the tape under the board. When the board fits perfectly, just zap it and you're done!

CERAMIC TILE — Kool Glide® with utility tape is great for (vertical) ceramic tile applications such as base and back splash. Remember, the adhesive on the utility tape is non-structural and should be not be used horizontal tile surfaces like counters and floors.

UTILITY TAPE / KGT-8000

- For hardwood, tile & composite.
- 4½-in paper, no scrim.
- Great for starter / end boards.
- 22-yard (66-ft) roll

KOOL GLIDE® PRO-W / KGX-6820

- Activates all KOOL GLIDE® seam and utility tapes.
- ¾-inch depth reach.
- 6-lbs

KOOL GLIDE® Advantages

Eliminates Face Nailing. Kool Glide installation of the starter and end rows gives you a smooth, attractive surface. No nail holes to putty. Also, it's much easier than face nailing on concrete.

Easy Board Replacement. Removing and gluing a perfectly fitting

board is one of the hardest tasks in board replacement. With Kool Glide, once the board fits, just zap it!

Easy to Use. The Kool Glide system is microprocessor-controlled so all the operator needs to do is place the tool over the tape and push th button.

Easy Repairs. With hardwood installation,

reactivating tape is a lot easier than pulling nails.

Safe. Kool Glide technology is low frequency and very safe to use.

Clean. With Kool Glide, the tool and the tape never touch. No messy glue.

Carpet Seaming. The PRO-W also doubles as a carpet seaming tool.
